About OpManager Nexus

Unified IT observability solution trusted by more than a million IT admins across the globe. It helps analyze **performance of your infrastructure stack**, pinpoint the root cause of issues, cruise through **SLAs**, and leverage the **AIOps capabilities** to predict & scale resources.

8 reasons to choose OpManager Nexus over PRTG

1. Supports **both Agent-based and Agentless methods** for monitoring critical IT infrastructure

2. Enables **network configuration and compliance management capabilities** out of box

3. Offers advanced **AIOps capabilities** with adaptive thresholds, and forecasting

4. **Monitor** Hazelcast, ActiveMQ, Kafka **for in-depth application performance analysis**

5. Understand **end-user experiences** with advanced **digital experience monitoring** and **APM insights**

6. **Workflow orchestration** supports out-of-box remediate actions for faster troubleshooting

7. **Powerful discovery rule engine, layer 2 mapping;** supports rack view, 3D floor features for visualization

8. Advanced **Firewall management & log analysis** to protect against rule & policy management lapses

About OpManager Nexus

Unified IT observability solution trusted by more than a million IT admins across the globe. It helps analyze **performance of your infrastructure stack**, pinpoint the root cause of issues, cruise through **SLAs**, and leverage the **AIOps capabilities** to predict & scale resources.

8 reasons to choose OpManager Nexus over PRTG

1. **Transparent/ flexible licensing model** - OpManager Nexus offers a simple, powerful licensing model with Professional and Enterprise editions, without recent price hikes unlike PRTG.

2. **Automated ITOps with AI-driven observability -** Enjoy dynamic thresholding, anomaly detection, predictive analytics, IT workflow automation, and forecast insights at no extra cost.

3. **Zia-powered predictive fault remediation -** Go way beyond simple predictions with predictive observability, powered by Zia, our in-house AI assistant. Not available in PRTG.

4. **Visibility into the entire IT stack -** OpManager Nexus offers Organization Map, Layer 2 mapping, Rack view, 3D floor view, and Business view for comprehensive infrastructure visibility, which is not available in PRTG.

5. **Digital experience Monitoring -** Seamlessly monitor real and simulated user journey to detect performance issues and optimize application delivery. Not available in PRTG.

6. **Comprehensive application performance tracing -** Get full-stack observability with real-time diagnostics and transaction tracing for deeper application insights. Not available in PRTG.

7. **Monitor your entire stack out-of-box -** Comprehensively monitor your application, network & infrastructure components without external scripts or add-ons, under a single console. Not available in PRTG.

8. **Versatile monitoring mechanisms -** Supports both Agent-based and Agentless methods for monitoring critical IT infrastructure. Agent-based monitoring is not available in PRTG.

Features available in OpManager Nexus but not in PRTG

Network Configuration and compliance management

- Automatic configuration backups
- Push / revert configurations across multiple devices
- Approval based configuration changes
- Configuration change management
- Routine checks for popular compliance standards like PCI - DSS

Firewall Management

- Security audit regulation
- Firewall policy management
- Firewall compliance reports
- Firewall rule anomaly analysis, impact analysis & rule management

Application Performance Management

- Application performance tracing
- Monitor 300+ application types out of box
- Monitor containerized and Kubernetes platform out of box
- Monitor real and simulated user experience
- Comprehensive code-stack trace with APM insights

Network and bandwidth monitoring

- Traffic shaping
- Layer 2 discovery & Organization maps
- Business views, 3D floor views
- Zia insights for forecasted fault remediation suggestions
- Cisco AVC Support
- Remediate workflow actions
- Reports for IPSLA, Cisco CBQOs, etc

Pricing - OpManager Nexus vs PRTG

OpManager Nexus allows monitoring unlimited metrics on devices at no additional cost, and hence is better suited for environments where multiple parameters have to be monitored

To monitor 100 network devices with 1000 parameters in total (assuming 10 metrics per device)

ManageEngine
OpManager Nexus

100 device license:

$2267

Without any upper limit on services per device

You save upto 72**% using OpManager Nexus**

PAESSLER
THE MONITORING EXPERTS

PRTG 1000 sensors pack

$3899

Without functionalities like remediate workflows, configuration & compliance management, etc

Get the ManageEngine advantage with OpManager Nexus

- Trusted by Over 100 Million users globally
- Unmatched product ecosystem and integrations
- 100% Bootstrapped, secure, and independent
- 20+ years of industry expertise
- Comprehensive data encryption, SOC 2 Type II compliance, and regular penetration testing.
